The image is a screenshot of the Google Australia homepage. At the top, there is a navigation bar with links: [Web](#), [Images](#), [Videos](#), [Maps](#), [News](#), [Books](#), [Gmail](#), and [more](#) with a dropdown arrow. On the right side of the top bar are links for [iGoogle](#), [Search settings](#), and [Sign in](#). The Google logo is prominently displayed in the center, with 'Australia' written below it. Below the logo is a large search input field. Underneath the search field are two buttons: 'Google Search' and 'I'm Feeling Lucky'. To the right of the search field, there are links for 'Advanced search' and 'Language tools'. Below the search area, there is a link for 'Important Information on the floods'. At the bottom of the page, there are links for 'Advertising Programmes', 'Business Solutions', 'About Google', and 'Go to Google.com'. A copyright notice '© 2011 - Privacy' is also visible. On the left side, a red box highlights the 'more' dropdown menu, which is open and shows a list of services: Translate, Scholar, Blogs, Realtime, YouTube, Calendar, Photos, Documents, Reader, Sites, Groups, and 'even more »'. Blue arrows point from the 'more' link in the top navigation bar to the highlighted dropdown menu, and from the 'Advanced search' and 'Language tools' links to their respective text labels.

# Keywords Are Main Ingredient

- Single keyword search
  - Often too general yielding far too many results
  - Worth a try for rare surnames or unique spelling variants
  - Depends on **google.com.au** vs. **google.com**
- Multiple keyword search enhances filtering
  - Better filtering → Higher relevance in results
- Not case sensitive & Common words ignored
  - GENEALOGY = genealogy = Genealogy = gEnEaLoGy
  - They slow response without enhancing quality of results
    - a, and, if, or, the, of, then, how, when, to, etc.

# Google Maps & Earth

- ▶ Locate and ‘visit’ addresses from documents
- ▶ Find points of genealogical interest eg church
- ▶ Google Suggest
  - Google works with what you give it...as you go
  - Helpful when you have only partial place names
- ▶ Google Local
  - Finds search results “near” a location
  - Cemetery near farley, wiltshire

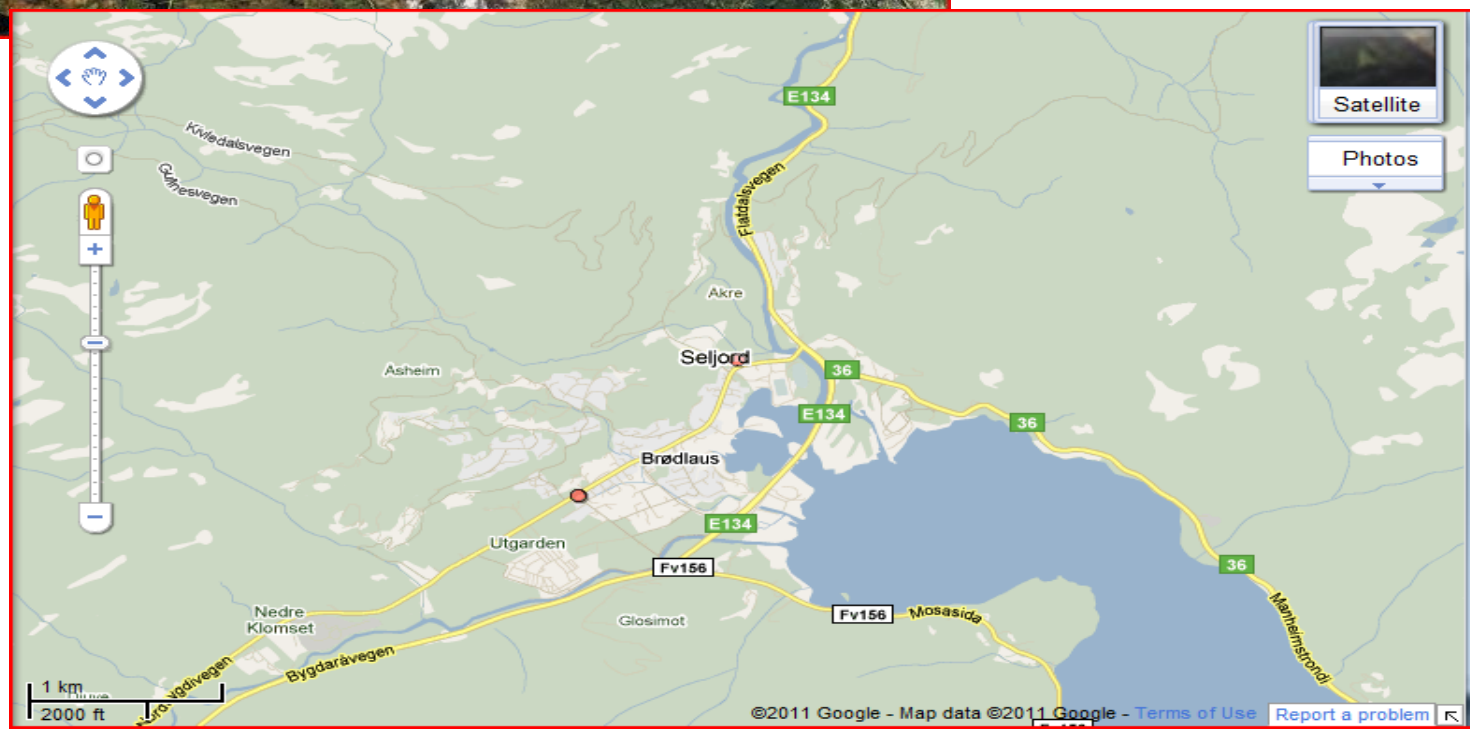

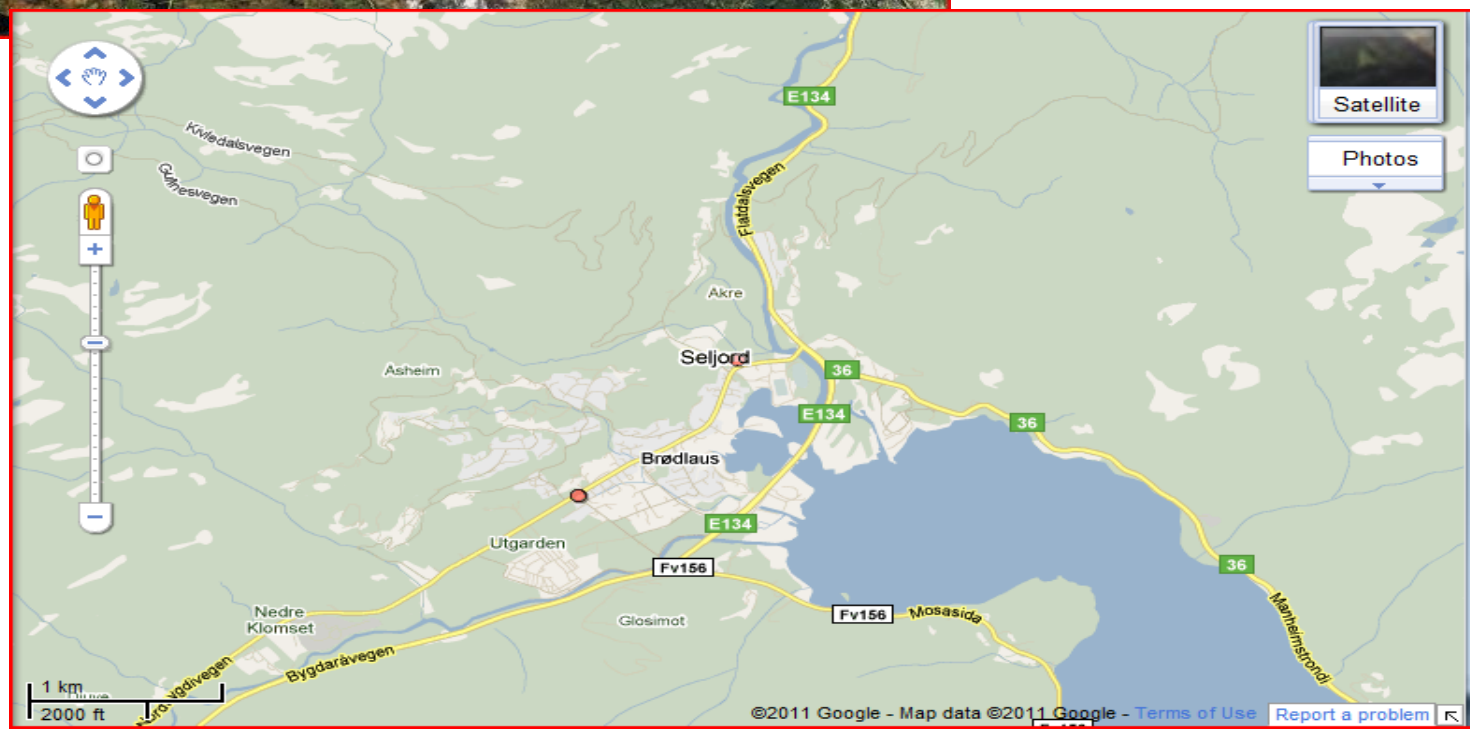

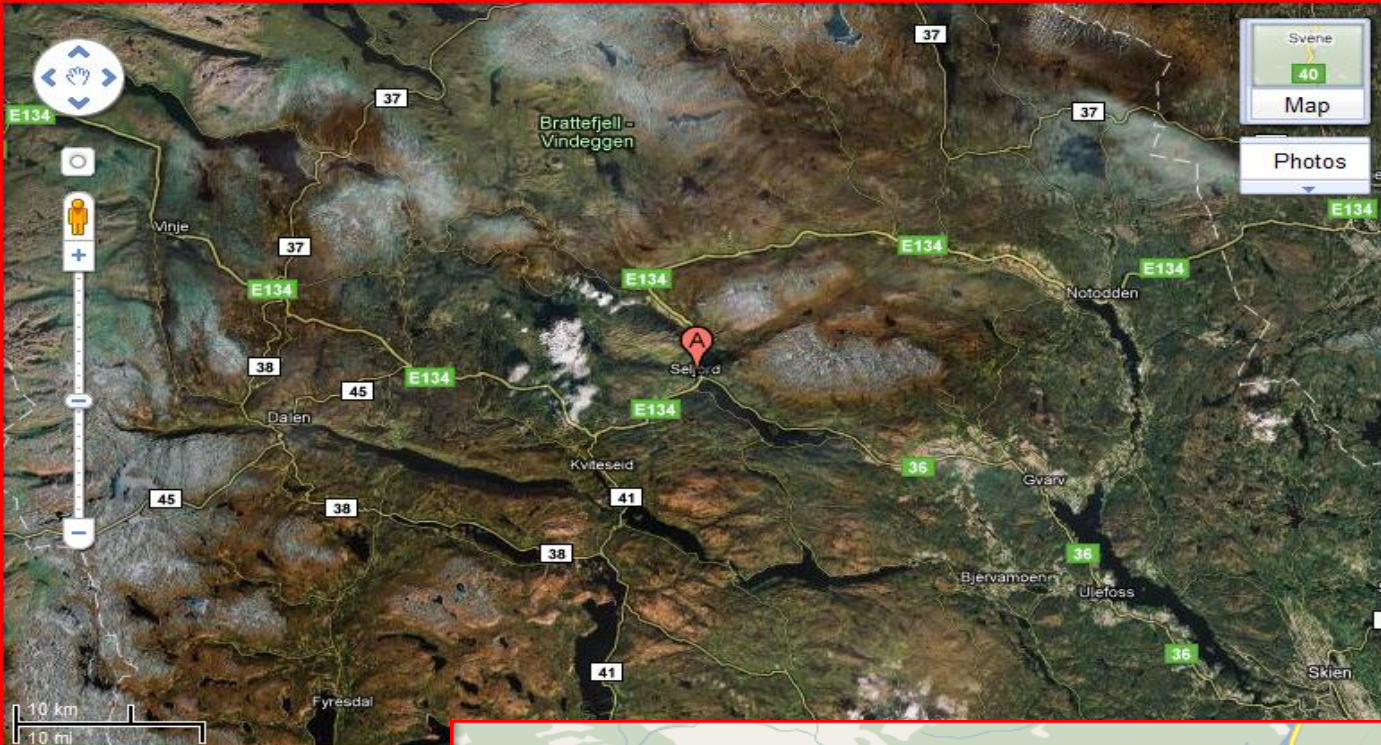

# Google Earth

- Standalone service via download, but ALSO integrated within Google Maps
- Satellite and aerial images stitched together
- No individual image more than 3 years old
- Resolution and coverage exceptional
  - Getting better all the time for remote areas as well
- Controls and navigation similar to Maps
- Adds a '3D view' element

# Google Street View

- Just as the name implies
- 360-degree 'Walk Around' from Street view
- Coverage getting better all the time
- Resolution not always great, but...
- Simply amazing!!
  - Walk your childhood neighborhoods
  - Follow a census enumerator
  - Pre-visit an upcoming destination
- Controversial for some
